Art Unit: 1614

Claims 1-11 are presented for examination.

Applicants' information disclosure statements filed March 19, 2002 and March 28, 2002 have been received and entered.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 U.S.C. § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-5 are rejected under 35 U.S.C. § 101 because the claimed invention is directed to non-statutory subject matter and are not being examined on the merits.

The phrase "use of" in claims 1-5 is not an acceptable claim language term used in the U.S. Patent Office. Applicants may wish to amend claims 1-5 to recite "a method of use" or "a composition".

Art Unit: 1614

Claim Rejections - 35 U.S.C. § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khan et al. (PTO-1449).

Khan et al. teach the antibiotic action of constituents of root bark of *Euclea natalensis* which contains a number of naphthoquinones. The reference teaches the naphthoquinones, such as 7-methyljuglone, diospyrin and plumbagin, applicants' preferred naphthoquinones, possess antibacterial and antifungal activity (see column 1, page 197).

Art Unit: 1614

The instant invention differs from the cited reference in that the cited reference does not teach the preferred naphthoquinones are used to treat tuberculosis in a patient caused by *Mycobacterium tuberculosis*, a bacteria. However, one skilled in the art would have been motivated to use the well-known antibacterial naphthoquinones, such as 7-methyljuglone, diospyrin and plumbagin, to treat or control any bacterial infection caused by a bacteria in the absence of evidence to the contrary.

Claims 6-11 are not allowed.

The reference listed on the enclosed PTO-892 is cited to show the state of the art.
